

Reference Audit Report — Revision R1

Manuscript: Can Ageing Be Slowed or Reversed? (mjdrdypu_451_26) **Audit date:** 23 June 2026

1. Overall reference counts

Item	Submitted (2026-04-24)	Revision R1 (2026-06-23)
Total references in pool	40	40 (14 in text; 26 in Supplementary Table S1)
References cited in main text	14 [1–14]	14 [1–14]
Author lists	Full author lists (up to ~19 authors)	Truncated to first 6 + “et al.” (Vancouver)
In-text citation style	Mixed	Superscript bracketed numerals throughout
Citation sequence	11–14 first cited after 15–40 (out of order)	Fixed: [1,2] → [3–14] → [15–40]
Duplicate references	None	None

2. Changes applied in R1

#	Reference(s)	Issue in submitted version	Action in R1
1	1, 2, 3, 6, 7, 8, 9, 10, 12, 13, 14	All authors listed (e.g., ref 6 listed ~19 authors)	Truncated to first 6 authors followed by “et al.”
2	4, 5, 11	—	Six or fewer authors; listed in full, no “et al.” (correct)
3	11	Author case had been corrected to title case at QA	Retained correct title case (Collins J, Longhurst G, Roschel H, Gualano B)
4	9	Journal “Aging” ambiguous	Disambiguated to “Aging (Albany NY)”
5	15–40	Listed but not individually cited	Retained in Supplementary Table S1; collectively cited [15–40] in Methods, after refs 1–14 first appear
6	Sequence	Methods cited [15–40] before Results introduced 11–14	Introduction now cites the full human set [3–14]; sequential numbering restored
7	In-text ranges	Runs of three or more consecutive citations were written out in full (e.g., [3,4,5,...,14])	Collapsed to hyphenated ranges per Vancouver style: [3–14], [2,4–6], [3,7–9,12–14]; two consecutive (e.g., [1,2]) left comma-separated

#	Reference(s)	Issue in submitted version	Action in R1
8	Missing bibliographic detail	Entries lacked volume, issue, and page/article numbers	Volume/issue/article and page numbers added from PubMed, Crossref, and publisher records (see Section 4)
9	Incorrect year	Ref 6 was dated 2026	Corrected to 2025 (PubMed publication year; eCollection January 2026)
10	DOI flagged for recheck	An external audit queried ref 12's DOI	Re-verified against PubMed (PMID 41766355); DOI 10.1093/gerona/glag061 confirmed correct

3. In-text citation sequence (R1)

Citation	Location	Status
[1,2]	Introduction, para 1	First citations
[3-14]	Introduction, para 2	Full human-evidence set; consecutive run collapsed to a range
[15-40]	Methods	Collective supplementary citation, after 1–14
[3-14]	Results, para 3	Re-citation of priority records
[2], [4], [6]	Results, exercise paragraph	Specific
[3], [7], [12], [13]	Results, diet/microbiome paragraph	Specific
[8], [9], [14]	Results, rapamycin/senolytic paragraph	Specific
[2,4-6]	Discussion, para 1	Exercise refs (4–6 collapsed)
[3,7-9,12-14]	Discussion, para 2	Pharmacologic / nutritional refs (collapsed)

All in-text citations resolve to a reference-list entry; all listed refs 1–14 are cited; numbering is strictly sequential by first appearance.

4. Per-reference verification (refs 1–14)

Ref	First 6 authors + et al.	Journal	Year;Vol(Issue):Pages	ID	Verification

Notes: Volume/issue/article and page numbers were added from PubMed, Crossref, and publisher records; entries verified directly against those sources are marked. Ref 6 was published in 2025 (eCollection January 2026); the publication year (2025) is used. Ref 12 (HALLO Pilot Study) DOI 10.1093/gerona/81.4.glag061 was independently re-checked against PubMed (PMID 41766355) and is correct. Where a DOI could not be confirmed, the PubMed identifier (PMID) is retained.
